*Block depth and corner width include 4" for variant depth textured face
**Base block have no bottom channel
All dimensions are listed in (DxHxW)

LEDGEROCK®

RETAINING WALL SYSTEM

AMCON CONCRETE PRODUCTS
2025 Centre Pointe Blvd, Suite 300
Mendota Heights, MN 55120
651.688.9116

We reserve the right to improve our products and make changes in the specifications and design without notice. The information contained herein was compiled in good faith to accurately represent the products and applications which are illustrated. Final determination of the suitability for the use contemplated and its manner of use are the sole responsibility of the user.

CURB APPEAL

The multiple faces of each version of LedgeRock were molded uniquely for Amcon Concrete Products from actual native Midwestern stone.

STRONG

The large-format, interconnecting design allows for walls up to 10’ high without grid.*

COST EFFECTIVE

Installation is less labor-intensive than conventional SRW’s which makes LedgeRock projects quick and easy.

VERSATILE

LedgeRock can be stained with solid or blended color after installation which allows the installer to create a fluid, aesthetic color to compliment any application.

QUARRIED LIMESTONE

NORTH SHORE BOULDER

FULL BLOCK

- 8 sq. ft. per block for optimal coverage (12 sq. ft. per corner block)
- Steps back 2” per course
- Tapered sides allows for gradual curves
- Full block have two connectors on top which fit into the bottom channel of the next row
- Recessed allows to bring topping (sod, mulch, etc) to the lip of the wall
- Available in standard, base (no bottom channel), recessed, corner, and corner recessed (corners offered in both right- and left-hand). Also available in xtra deep (see below).

HALF LONG BLOCK

- Half the size of full block optimal fitting
- Steps back 2” per course
- Tapered sides allows for gradual curves
- Helps to maintain the wall’s running bond pattern
- Half block have one connector on top which fit into the bottom channel of the next row
- Conveniently packaged two blocks per pallet
- Available in standard, recessed, corner, and corner recessed (corners offered in both right- and left-hand). Also available in xtra deep (see below).

HALF HIGH BLOCK

- Half the height of full block
- Steps back 1” per block
- Can be integrated with full block to create Ashlar patterns
- Available in standard, half long, and corners

KEY BLOCK

- Face is 4” narrower than full block for optimal fitting
- Steps back 2” per course
- Tapered sides allows for gradual curves
- Available in standard and recessed
- Key block maintains wall’s running bond when using corner blocks (for each corner block the row loses 2” in setback)**

** Example, if using corner block on both sides of a wall, you lose 4” per course and will need to use 1 key block on the 2nd course, 2 on the 3rd course, 3 on the 4th course, and so on until you get to the 12th course where a key block is not necessary. Begin pattern again at the 13th course.

XTRA DEEP BASE BLOCK

- 52” deep for additional strength (24” deeper than full block)
- Steps back 2” per course
- Allows you to build up to 10’ high without grid*
- Tapered sides allows for gradual curves
- Available in full width, half width, and with or without bottom channel

* Depending on site conditions
