

MAMMOTH STONE®

ARCHITECTURAL SERIES

 **AMCON®**

MAMMOTH STONE® ARCHITECTURAL SERIES

Mammoth Stone® Series CMUs are multi-sized units available in Splitface/Rockface, Burnished, Travertina™, or Ultra-Fine finishes. The unique face options and multiple sizes provide limitless design possibilities by allowing for the use of ashlar patterns or by creating your own signature look.

- Choose from Splitface/Rockface, Burnished, Travertina™, or Ultra-Fine Finish to compliment the surrounding architecture
- Over 40 standard solid and variegated colors or work with our team to create your own signature color blend
- Available in 14 standard shapes that can be used individually or combined to create your own unique ashlar pattern
- Manufactured using Amcon™ Envirotrol Curing to ensure completely hydrated, fully-cured, “pre-shrunk” units to reduce the potential for efflorescence
- Also available using Amcon™ Sustainable Solutions mix design for eco-friendly or LEED projects
