CEMSTONE

## **ABOUT US...**

#### **CEMSTONE COMPANIES**

Founded by the Becken family in 1927, Cemstone offers truly integrated and sustainable "concrete solutions" for its customers in the Upper Midwest and across the country.

Cemstone owns and operates a network of ready-mix concrete plants and aggregate facilities, which includes our sister companies, Cemstone Concrete Materials LLC in Southern Minnesota and Iowa and our Wisconsin locations - Cemstone Ready Mix, Inc. The company offers a full line of ready-mixed concrete, decorative concrete, high performance concrete, aggregate products, concrete masonry units, brick and decorative stone. Cemstone also provides professional grade supplies and materials through its network of Contractor Supply Stores.

Cemstone's fleet of ready mix trucks and concrete booms deliver and place quality concrete for everything from residential driveways, to above grade walls in homes built with Insulating Concrete Form (ICF) technology, to high-rise commercial buildings and sports stadiums.

The company's engineering services group includes a team of licensed engineers, geologists, certified field technicians and support staff to assist the design community from the development of a project to its completion.

Cemstone's commitment to the environment helps define our culture and guides our business. We are a recognized leader in sustainable concrete technologies, such as pervious concrete, and the application of Leadership in Energy and Environmental Design (LEED®) practices.

## **AMCON CONCRETE PRODUCTS**

For over 30 years Amcon Concrete Products has set the standard for quality and service to architects and building professionals in the upper Midwest. Founded in 1977, Amcon Concrete Products is one of the largest suppliers of quality block and architectural CMU projects across the upper Midwest.

#### **TCC MATERIALS**

In 1957, The Cemstone Companies began packaging pre-blended cement based building materials in Minnesota under the Handi-Crete brand. In 1973, The Cemstone Companies purchased the Twin City Concrete Products Company (TCC) and its Minneapolis facility from Texas Industries, Inc. Operating under the original name; TCC built a manufacturing plant in St. Paul, MN in 1980. In the coming years, TCC added new production facilities in

Iowa, South Dakota, North Dakota, Wisconsin, Minnesota, Nebraska, Kansas, and Georgia. In 2006, the company began doing business as TCC Materials® to strategically align our growth and diversification in spec blended construction products servicing the building materials industry. In 2020 TCC Materials created Bluestone Products as the specialty packaging arm.

Today, TCC Materials offers a complete line of packaged concrete and masonry products to satisfy needs from the do-it-yourselfer to the professional contractor.

Quality products and service along with new and improved products continue to keep TCC Materials as the leader in the packaged concrete, sand and mortar industries in the Midwest.

In compliance with Federal and State equal employment opportunities laws, qualified applicants are considered for all positions without regard to race, color, religion, sex, national origin, age, marital status, veteran status, disability, or any other protected class.

## **OUR COMMITMENT TO SAFETY**

#### **SAFETY MISSION**

The personal health and safety of each employee is of primary importance. The prevention of occupationally induced injuries and illnesses is given precedence over operating productivity whenever necessary. In keeping with the highest standards, management will provide all reasonable mechanical and physical facilities required for personal health and safety. We will maintain and enforce a health and safety program conforming to industry best practices. This program requires cooperation in all health and safety matters between not only supervisor and employee, but also fellow employees. Only a cooperative effort can improve safety performance.

## CRITICAL COMPONENTS OF OUR SAFETY PROGRAM

- Conducting a program of health and safety that includes inspections to identify and control unsafe working conditions or practices, control health hazards, and to comply with the health and safety requirements for every job.
- Training all employees in good health and safety practices, and conducting individual and group meetings to communicate safety issues.
- Providing necessary personal protective equipment and instructions for its use and care.
- Developing effective health and safety policies and requiring that employees understand and adhere to these rules as a condition of employment.
- Understanding that unsafe behavior, specifically the interaction between employees and equipment, is the root cause of most incidents.
- Conducting prompt and thorough investigations of every accident to determine the cause and correct the problem so that it will not occur again.
- Ensuring that safety is never compromised for our employees or customers and that all employees: operational, administrative or otherwise are held accountable to the same extent.
- Recognizing that all injuries, work related injuries and environmental incidents are preventable; and providing mechanical and physical safeguards to the maximum extent possible.
- Focusing on the safety program and unsafe behavior will result in a reduction of incidents with the ultimate goal being the elimination of all recordable injuries, illnesses and incidents.

## Our Mission

## - CEMSTONE -

To achieve the highest standards of excellence in the building materials industry with dedicated people each committed to exceed customer expectations through quality products, professional service, ongoing innovation and sustainable technologies.

## -TCC MATERIALS -

TCC Materials will continue to grow by building on its reputation of Quality, Service and Trust to provide the construction materials market with concrete and masonry solutions. We will accomplish this through focused initiatives to continuously improve the performance and cost effectiveness of products and services.
